1. Study name  Examination of allergen removal effect by suction activity using bedding cleaner

2. Specimen

Specimen  VCEN-100

Control  No suction

3. Test summary  Fifty mg of house dust was sprayed on the outer fabric surface or inside (surface of the inner cotton) of bedding (hereafter spraying region), and suction was performed for the spraying region using the specimen by making fixed times of round trips at 20 cm/second of speed. (Figure 4-1) Regarding spraying of the inside of the bedding, suction was performed from the top of the outer fabric. After that, allergen was extracted from the spraying region (hereafter extraction liquid) and the amount of residual allergen was measured by ELISA. The same treatment was performed for the control except for suctioning.

4. Test conditions

Suction target  Pseudo-bedding contaminated with allergen
  Bed pad*:1  Outer fabric: polyester 100%
  Inner cotton: polyester 100%
*1 Bedding that was normally used for tests in ITEA was utilized.

Target allergen  Allergen derived from excrement of Dermatophagoides farina, Der f 1

Target allergen configuration  House dust (special ordered item, made in ITEA)

Spraying amount  House dust 50 mg

Suction speed  20 cm/seconds

Suction time  Equivalent of 3 min/m² (Successive 3 round trips per spraying region)
  Equivalent of 4 min/m² (Successive 4 round trips per spraying region)
  Equivalent of 5 min/m² (Successive 5 round trips per spraying region)

The number of samples  n=3

Measurement of allergen  Sandwich ELISA*2
  *2 Samples for measuring were prepared by diluting extraction liquid with a diluent for ELISA measurement at a proper dilution ratio.
Evaluation method: An allergen residual rate was obtained using the following formula.

\[
\text{Allergen residual rate (\%)} = \frac{X}{Y} \times 100
\]

X: The amount of residual allergen per spraying region after suction (ng)
Y: The amount of residual allergen per spraying region in the control (ng)

5. Results

Table 5-1. The amount of residual allergen per spraying region (Der f 1) and allergen residual rate
